OUR S2 GUARANTEE
STARTS WITH 2 PULLS EVERY TIME GUARANTEED

Briggs & Stratton Corporation guarantees to the original owner on all our Ready-Start® equipped engines **S2 Guarantee**. This S2 Guarantee offers you and your customers peace of mind that our engines will start within two pulls every time – guaranteed. The guarantee covers select engines purchased on July 1, 2008 or later, and applies for a period of two years from the date of the original purchase. Engines used commercially are not covered.

Our continual pursuit for total product reliability backed by a 100 years of design and innovation has resulted in this unique product guarantee.

For details visit www.BRIGGSandSTRATTON.COM/eu/en, or contact your Briggs & Stratton Sales Representative.

NO PRIMING, NO CHOKING.
JUST PULL FOR POWER.
ReadyStart® – The Standard for Easy Starting.

MODEL 3867
VANGUARD™ V-TWIN OHV 23.0 HP

Vanguard™ engines come in a variety of power levels. Please contact your Briggs & Stratton Sales Representative for details.

QUETONE

QUETONE™ Less Noise.

Laminated blower housing and deep shell muffler reduce engine noise resulting in up to 1 db less noise. The Quietone™ feature is optional on all 650 and 675 Series™ engines.

DOV® (Direct OverHead Valve) engine is the First of its Kind.
It has fewer moving parts and metal-to-metal contacts. Unlike an OHC engine, it has no drive belt or chain. This allows the engine to deliver quieter operation, less vibration and exceptional power. The 700 Series™ uses the patented DOV® technology.

ANTI-VIBRATION SYSTEM (AVS®) Smoothing out the Ride.

- Patented Linear Balancing System
- Up to an 80% reduction in engine vibration.
- Less wear and tear on your engine, your equipment and you.

PERFORMANCE

MODEL 0954
I/C®
3.5 HP

I/C® SERIES engines are designed to meet the needs of tougher jobs. The step-up OHV engine configuration features a **Dura-Bore™ cast iron sleeve** that withstands wear and abuse while providing improved oil control. The engines have a **Teflon® coated bronze bearing** that is self-lubricating, and also a **Dual-Clean™ air filter** for added protection. The combination of a cast iron sleeve, stronger bearing and improved air filter deliver a powerful and longer lasting engine.

Teflon® is a registered trademark of Du Pont.

VANGUARD™ LIQUID COOLED
3/LC DIESEL 23.6, 26.5 HP
3/LC TURBO DIESEL 31.0, 34.0 HP

PREMIUM-GRADE VANGUARD™ engines are designed and application engineered to meet the requirements of the most demanding commercial applications. They incorporate powerful **OHV (OverHead Valve) technology** for maximum performance and a number of advanced features that extend the engine life, minimize maintenance, and assure easier starts and lower noise levels.

- Heavy-duty rewind and rope
- Stronger forged crankshaft and cast iron camshaft
- Dual ball bearings (both sides)

Engines equipped with **COOLER / CLEANER technology** extends engine life by reducing engine and oil temperatures, while effectively managing airborne debris.

COOLER / CLEANER Technology

- **Perforated steel rotating screen**
Greatly improves debris management, which allows for better airflow and increased engine cooling, while less maintenance.
- **Larger phase modulated cooling fan**
Generates significantly increased airflow, which reduces engine and oil temperatures by 15° - 18° Celsius resulting in longer engine life.
- **High-flow, 1-1/16" deeper blower housing with expanded rewind starter opening**
Efficiently directs more cooling air around the working areas of the engine to dramatically reduce operating temperature; effectively increases CFM (cubic ft./min.) from 420 to 620 at 3600 rpm
